

Characteristics

Hydraulically operated directional control valves are available in 5 sizes:

- D1VP*4L NG06 – operated via end caps
- D1VP*90 NG06 – operated via end caps and mounting interface (X, Y)
- D3DP NG10 – operated via mounting interface (X, Y)
- D4P NG16 – operated via mounting interface (X, Y)
- D9P NG25 – operated via mounting interface (X, Y)
- D11P NG32 – operated via mounting interface (X, Y)

Size NG06 (D1VP) is available in two different designs:

- D1VP*4L for operating pressure >10 bar (over tank pressure) with control ports in the end caps.
- D1VP*90 for operating pressure >15 bar with control ports in the end caps and mounting interface (X, Y).

All other series are operated only via mounting interface (X, Y).

The shifting time is depending on the pilot pressure. For safe operation the minimum pilot pressure has to be ensured in all operating conditions. The maximum pilot pressure varies from the maximum operating pressure in some sizes.

D1VP*B*4L

D1VP*90

D1VP*C*4L

D1VP*90
